MS Series DC POWER SUPPLY— Features

SMPS

Product features and advantages

【Compact and exquisite appearance】

- ▶ Small size, light weight, and easy to carry. USB charge port of 9V2A

【High precision display for voltage,current, power】

- ▶ 4 digital display, 10mV and10mA resolution,Easy to use with the display of voltage,current, power.

【Independent output control button】

- ▶ Independent button to control the output on or off ,whihc effiecnly to avoid the direct output damage to the load instrument

【Powerful protection】

- ▶ Five powerful protection for over voltage, over current, over power, over temperature,short circuite;

► Technical parameter table

Input & Output	
Input voltage	Option for AC 110V±10% or AC 220V±10%, 50/60Hz
Output voltage	DC0-30V, 0-5A, adjustable
Display Stability	
Voltage Stability	≤± (0.2%+5digits)
Current Stability	≤± (0.5%+5digits)
Load Stability	≤0.5%
Ripple and Noise	≤1% (Valid values)
Display Resolution	
Voltage Resolution	<100V : 10mV;
Current Resolution	<100A : 10mA;
Power Resolution	<10W : 1mW ; ≥10W : 10mW; ≥100W : 0.1W ; ≥1000W : 1W
Product size&weight	
Product size	D180×W105×H85mm
Product net weight	1.5kg

Main functional features

Quality Assurance

Economical and practical

Current and voltage can be pre-set

SENSE compensation interface

OUTPUT SWITCH

SETOUT function

Multiple protection

Widely used in product aging maintenance, battery charge, experimental test, production test, electroplating ,etc.
